Banyumas, 53183

A graduate of Telkom University's Information Systems program with over 2 years of experience in cross-platform mobile application development (Flutter/React Native). Implementing Clean Architecture, client-server integration, and accustomed to performing application quality checks and compiling structured bug reports to accelerate repairs and maintain application quality. Enthusiastic about learning new technologies, especially advances in AI (Artificial Intelligence) to optimize the development process and create digital solutions.

Work Experience

Hugo Studio - **Purwokerto**   Jul 2025 - Oct 2025

- Developed two savings and loan cooperative applications (PDL & Verifikator) with more than 10 active financial modules.
- Conducted effective communication and continuous improvement of the development and testing processes.
- GetX modularization reduced code duplication by 45% and accelerated member data validation.
- Wrote clear bug reports for faster fixes.

Arkamaya - **Kota Bandung**   May 2025 - Aug 2025

- Developed two POS & POS Social Media applications for 30+ active tenants, based on React Native (Redux) and Flutter (GetX).
- Optimized UI and state management reduced screen load time by 40%.
- Designed API structure and PostgreSQL (Supabase) tables for query efficiency and data consistency across platforms.
- Performed UI performance optimization and state management.
- Actively participated in sprint planning, code review, and cross-team integration (BE, QA, SA) to ensure development standards.
- Retest & Close: verifying the latest build, checking surrounding areas to prevent regressions.
- Using Postman for API testing (auth, booking, order); catching response/HTTP code inconsistencies early on.
- Creating bug reports: including steps, expectations vs. results, evidence (video/log), test environment, and severity/priority.

CV Satria Tech - **Purwokerto**   Aug 2023 - Oct 2024

- Developed two main applications: Plantix (digital agriculture) and E-Commerce Marvelindo (Smartfren product distribution).
- Integrated Supabase (PostgreSQL) & Laravel API, improving data synchronization reliability by ±40%.
- Optimized UI made the outlet ordering process 25% faster and API response more stable.
- Tested on multiple Android versions and network conditions; reduced crashes when accessed.
- Created bug reports with video/logcat evidence; issue resolution time became shorter.

Kampus Gratis (M-Knows Consulting) - **Jakarta Selatan**   Feb 2023 - Jun 2023

- Developing 4 LMS modules (Course Registration System, Guide, Study Plan, My Studies).
- Supporting over 250 study programs and over 5,000 students with LMS & LXP API integration.
- Reducing bugs by up to 30% and maintaining a PR error rate below 3% from over 100 pull requests.
- Supporting Agile sprints with iterative testing and releases, accelerating the development cycle by 20%.
- Preparing bug report formats for faster handling.

Education

Universitas Telkom Purwokerto ✅ - **Kabupaten Banyumas**   Aug 2020 - Oct 2024

Bachelor of Information System, 3.87/4.00

- Led a team of 4 people in application development, completing the project 2 weeks ahead of schedule.
- Assistant lecturer in Mobile Device Programming, increasing the pass rate of students to 95%.

- Published a journal article titled "Decision Making Analysis Using the Moora Method" with over 50 citations.
- Developed an E-Commerce application with Clean Architecture, improving performance by 40%.

SMA Negeri 2 Purwokerto ⊘ **- Kabupaten Banyumas**   Mar 2017 - May 2020

Senior High School, Social Sciences, 87.27

- 1st place in the 2018 Banyumas Regency Paskibra Competition
- Member of the 2019 Banyumas Regency Paskibraka
- Improved group coordination by 75% through a structured management system
- Led a team of more than 20 people in various school events
- Improved team communication by implementing daily briefings

Organizational Experience

Purna Paskibra Indonesia - **Purwokerto**   Aug 2021

Staff

- Active in activities that support leadership, discipline, and nationalism development among members.
- Leading and managing training schedules for more than 30+ members.

Pasukan Pengibar Bendera (Paspara) - **Purwokerto**   Nov 2020

Head of Facilities Division

- Manage and ensure that 75% of equipment needs are met efficiently and on time.
- Organize coordination with external parties.

Skills, Certifications & Other Experience

- **Hard Skills (Technical)**: Dart, Flutter, Java Script, React Native, Clean Architecture, Laravel, API Integration, Mobile Development, MySQL, PostgreSQL, System Analysis
- **Soft Skills** : Team Leadership, Project Management, Problem Solving, Project Management, Analytical Thinking, Time Management, Communication
- **Tools**: VS Code, GIT, Firebase, Postman, Figma, Trello
- **Sertifikasi** ⊘ (2024): BNSP - Junior Mobile Programmer
- **Projects** ⊘ (2024): Developed a queue application
- **Projects** ⊘ (2024): Developed Document Scanning Application
- **Projects** ⊘ (2023): Front-End App LMS "Kampus Gratis"
- **Projects** ⊘ (2024): Developed Front-End Book management application
- **Projects** ⊘ (2024): Developed Front-End for a Tourism Information System Application - IDCamp (2024)
- **Projects** ⊘ (2024): Developed Cryptography Application (Steganography)
- **Projects** ⊘ (2024): Developed a Food Management Application
- **Projects** ⊘ (2025): Developed Travel Ticket Booking Application
- **Course** ⊘ (2023): Intensive Bootcamp Flutter for Mobile Development Batch 16, Edspert.id
- **Course** ⊘ (2024): Learn SOLID Programming Principles, Dicoding Indonesia
